Not: rott2 ve colon/xgboost_cox icin log dosyasi "TAMAMLANDI" gostermesine ragmen, GitHub'daki gercek sonuc dosyalari (vimp_summary.csv / shap_summary.csv) dogrudan kontrol edilerek eksik oldugu tespit edildi. Satir 33-36 (nwtco, dataDIVAT3, Framingham, flchain), pipeline'in bellek (OOM) sorunu nedeniyle SHAP asamasinda takili kalan, henuz tamamlanmamis veri setleridir - bu setlerde model egitimi ve performans metrikleri (cindex, IBS vb.) buyuk olcude hazirdir, sadece SHAP eksiktir.
